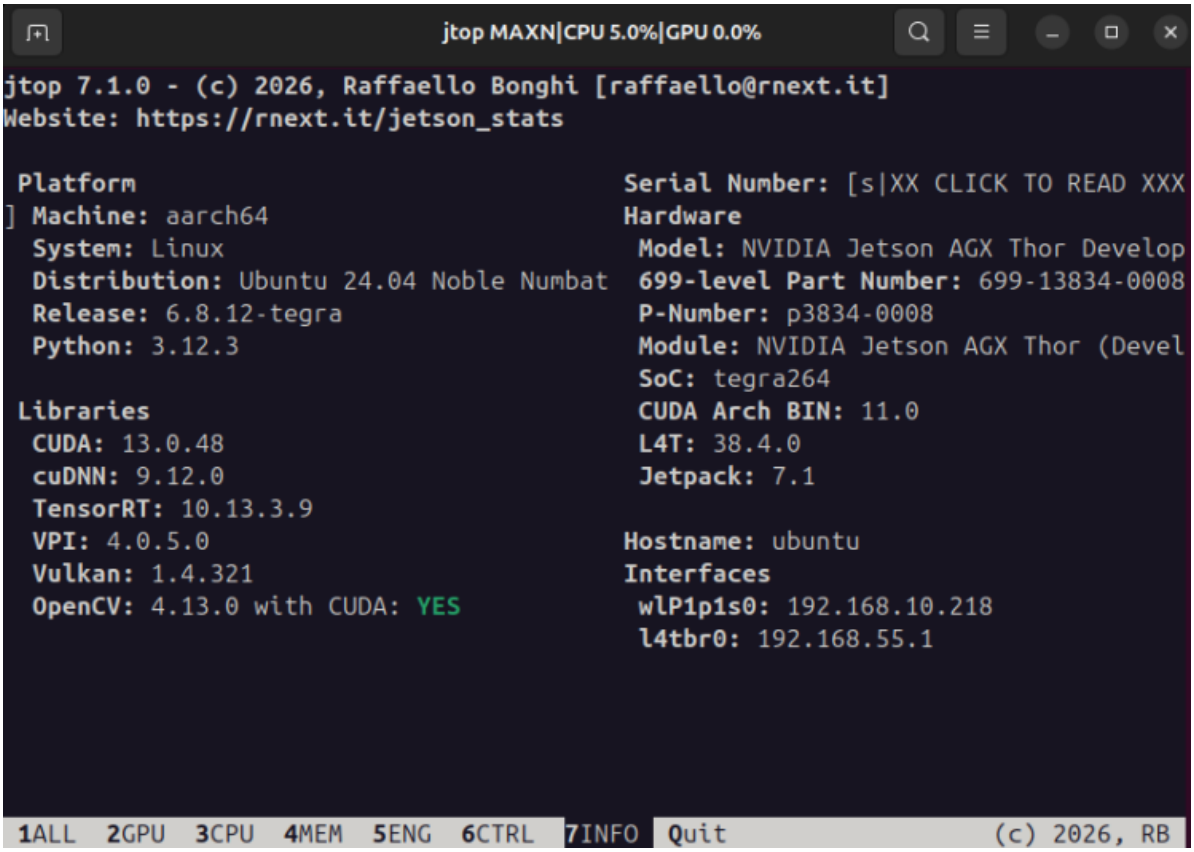
Setting up the Torchvision Environment

Setting up the Torchvision Environment

- 1. System Information
- 2. Installing Dependencies
- 3. Installing Torchvision
  - 3.1. Offline Installation
  - 3.2. Online Installation
- 4. Verifying the Installation

1. System Information



2. Installing Dependencies

torchvision and torch require corresponding versions, so please install torch first according to the "Setting up the PyTorch Environment" tutorial, and then install torchvision.

Version Compatibility Lookup:

```
https://github.com/pytorch/vision#installation
```

torch	torchvision	Python
main / nightly	main / nightly	>=3.10, <=3.14
2.10	0.25	>=3.10, <=3.14
2.9	0.24	>=3.10, <=3.14
2.8	0.23	>=3.9, <=3.13
2.7	0.22	>=3.9, <=3.13
2.6	0.21	>=3.9, <=3.12

Based on the version compatibility matrix between PyTorch and Torchvision, since the installed version of Torch is 2.10, you need to install Torchvision version v0.25.

3. Installing Torchvision

You may choose either the offline or the online method to install Torchvision.

3.1. Offline Installation

Manually visit the download URL to download the latest version of Torchvision.

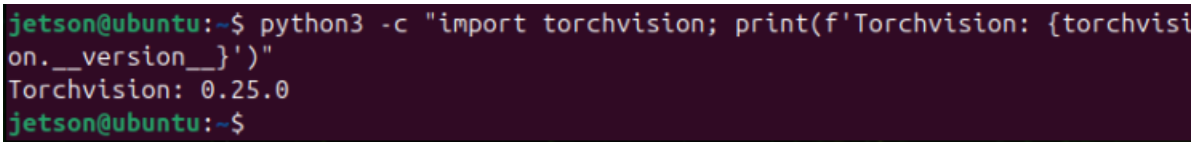
Download URL: https://pypi.jetson-ai-lab.io/sbsa/cu130/+f/62e/2fd4aaade43f3/torchvision-0.25.0-cp312-cp312-linux_aarch64.whl#sha256=62e2fd4aaade43f398d7ab31515b4a05c4cc8428d54ab248caa526c155ffc88e

```
cd Downloads/
```

```
sudo pip3 install torchvision-0.25.0-cp312-cp312-linux_aarch64.whl --break-system-packages
```

3.2. Online Installation

```
sudo pip3 install torchvision --break-system-packages --index-url https://pypi.jetson-ai-lab.io/sbsa/cu130
```

4. Verifying the Installation


```
python3 -c "import torchvision; print(f'Torchvision: {torchvision.__version__}')"
```
