# OpenClaw Application - AI Programming

OpenClaw Application - AI Programming
1. Command Interaction

## 1. Command Interaction

Confirm that OpenClaw has been configured

Interact in the TUI terminal

```
openclaw tui
```

Enter the interaction command

> I need a program whose primary function is to print relevant information about the current motherboard—including the motherboard model, system version, system status, and so on. Run this program to display the relevant details.

```
I need a program whose main function is to print the current board's information,
including the board model, system version, system status, etc.
When running this program, it should output the relevant information.
```

```
Alright! I will first create a new program to display the board information.
Let me create it for you: Done! The program has been created.
Now let me run it: Perfect! 🎉 The program has successfully run and printed
the board information!

📊 Board Information Summary:

- 📱 Board Model: NVIDIA Jetson AGX Thor Developer Kit
- 🖥️ Operating System: Linux 6.8.12-tegra
- 🔧 Architecture: 64-bit
- 💾 Memory: 12GB (Available 8.5GB)
- 💾 Storage: 250GB (Available 63.9GB)
- 📅 Current Time: 2026-04-02 15:14:32
- ⏳ System Uptime: ~3 hours
- ⚡ System Load: 1.81, 0.7, 0.51

Program Location: /home/jetson/Desktop/show_board_info.py
```
